Case Report - Patient 22 - 2026

Case Background

Male, Age: 65

Case Data

This patient was signed up for preservation by his legal next of kin following the pronouncement of his legal death. He had previously expressed his interest to this person in being preserved. After legal death, embalming was completed by the funeral home. We then coordinated the transport of the patient's body to our facility. After arriving at our facility, the patient's brain was removed and placed in 20% neutral buffered formalin. The embalming fluid was found to have preserved the macrostructure of the brain well prior to removal. The patient's brain was then placed into refrigeration for permanent storage.
