Case Report - Pet Patient 5 - 2017

Case Background

Feline

Timeline

Day 0 - Monday - 12:54pm - The family reached out regarding chemical preservation services.

They informed us that the pet had passed approximately 12 hours earlier and was placed in refrigeration.

- The family transported the pet overnight with dry ice and frozen gel packs.

Day 1 - Tuesday - The pet patient arrived at our facility. Surgical procedure began, cephalic isolation and removal of the top of the skull. The entire cephalon was placed into a solution of 10% neutral buffered formalin and 3% glutaraldehyde; which was placed in refrigeration for permanent storage.
